FreshStream+ Tankless RO

A Uniquely Superior Water Treatment System

For your comfort, convenience and safety

The Kenai FreshStream+ is a uniquely superior reverse osmosis water system that provides your family with cleaner, healthier, and better tasting water. The Kenai FreshStream+ is an undersink tankless reverse osmosis filter system optimized to treat city water using the existing water pressure. The quick-connect disposable filter cartridges and RO membrane assembly are designed to make installation and replacement quick, easy, and sanitary.

CPK-000000 Tankless RO
CPK-000000 Smart Faucet

Features of this Tankless RO System:

- **Ultra-Slim Design:** Maximizes undersink space and offers greater installation flexibility.
- **Fast Flow Rate:** Delivers purified water at 600 GPD (gallons per day) — filtered instantly for quick and convenient use.
- **PCF + Reverse Osmosis Filtration System:** Combines advanced particle removal with high-precision 0.0001-micron filtration to achieve up to 99.99% reduction of heavy metals, bacteria, and organic contaminants, delivering cleaner water.
- **Easy Filter Replacement:** Horizontal pull-out filter design with dual water-stop technology allows for quick, tool-free filter changes without shutting off power or water.
- **Intelligent Filter Life Reminder:** Multiple reminders with faucet ring lights, machine indicators,and a buzzer ensure timely filter replacements.
- **Built-In Leak Sensor:** Instantly detects leaks and triggers an alarm to prevent potential issues

Start enjoying the Kenai FreshStream+ difference today.

Contact a Kenai authorized dealer to install a FreshStream+ Professional Series Water Treatment System and start enjoying all the benefits of this Tankless RO system.

Why do I need an RO?

Peace of Mind: Knowing that you have a reliable system in place to provide you with cleaner, safer drinking water can offer peace of mind for you and your family.

Removal of Contaminants: RO systems are highly effective at removing a wide range of contaminants from water. This includes heavy metals, dissolved solids, bacteria, viruses, and many chemical pollutants.

Improved Taste and Odor: The filtration process in an RO system can significantly improve the taste and odor of water by removing impurities that contribute to unpleasant flavors or smells.

Health Benefits: Consuming cleaner, more purified water is essential for good health. RO systems can provide you with higher-quality drinking water that can be free from harmful contaminants.

Cost-Effective: While the initial cost of purchasing and installing an RO system may seem high, it can be more cost-effective in the long run compared to buying bottled water or other water purification methods.

Environmental Benefits: Using an RO system can help reduce the consumption of single-use plastic bottles, which is better for the environment.

Convenience: Having a dedicated RO system means you have a constant supply of more purified water right at your finger-tips. You don't have to rely on buying bottled water or using pitchers with replaceable filters.

KENAI™

FreshStream+ Tankless RO

SPECIFICATIONS

Water Pressure
15-58 psi

Temperature
41-100°F

Flow Rate
600 GPD

Inlet Water Interface
3/8"

Outlet Water Interface
1/4"

Filter Configuration
#1 PP+Carbon (PCF)
#2 RO Membrane (RO)

Rec. #1 PCF Filter Replacement Cycle*
12 months

Rec. #2 RO Filter Replacement Cycle*
24 months

Filter Replacement Reminder
Faucet (Lamp Ring)
Machine (Indicator Light + Buzzer)

Water Leak Alarm
Yes

Net Weight
16.3 lb

REDUCED CONTAMINANTS

Arsenic
Barium
Cadmium
Chromium III & VI
Copper
Fluoride
Lead
Nitrate
Nitrite
Radium 226 & 228
Selenium
